FCMI label replaced with FCPI on E-Ticket display

We wish to share the change in FCMI label on E-Ticket (TWD) display. Amadeus has redefined the Fare Calculation Mode Indicator (FCMI) to align with IATA standards. The Fare Calculation Indicator generated at pricing is now known as Fare Calculation Pricing Indicator (FCPI).

Overview

The system generates a Fare Calculation Pricing Indicator (FCPI) when you price or issue a ticket. The FCPI is a letter or number that indicates how the itinerary was priced. The FCPI is visible in the TST display as well.

Note: An FCPI is also known as a Fail Code.
