

IATA TIMATIC

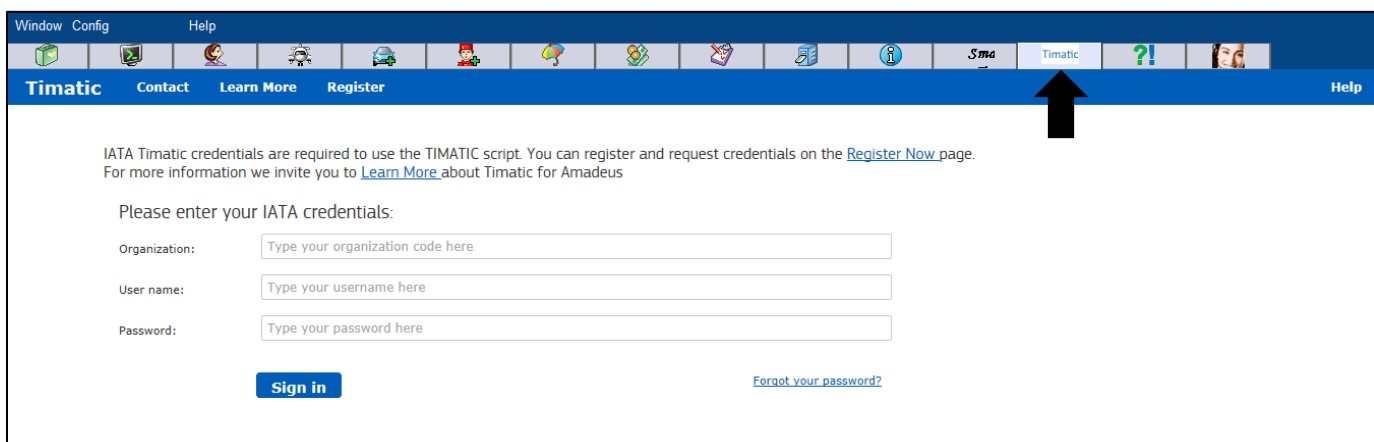

IATA TIMATIC is the industry standard used by Airlines and travel agents to verify passengers' travel document requirements for their destination and any transit points (e.g., passport & visa requirements, etc.).

TIMATIC in Amadeus was set of cryptic entries which allowed travel agents to access information provided by IATA via an Amadeus connection.

Amadeus IATA TIMATIC cryptic entries (TIFV, TIFH etc.) has been deactivated.

At present, IATA TIMATIC information is available through the Smart Tab in your Amadeus Selling Platform.

“**Learn More**” will provide more details on FAQs about the product and its usage.
