TST ENHANCEMENT - NEW INDICATOR FOR BAGGAGE ALLOWANCE UPDATE

We are pleased to share update on TST indicator, upon changing the baggage allowance manually.

Overview:

The baggage allowance is visible at TST display level and can be updated manually by the travel agent. When it was manually updated, the agent had no means to verify in the TST if any update was made. And, so agent could receive ADMs due to the changes done on the TST towards the baggage allowance.

To avoid such a situation, Amadeus has enhanced its ticketing feature by showing an indicator at TST display level whenever a baggage allowance is updated on a TST.

Key Feature:

- An indicator (+) will be shown in the TST upon changing baggage allowance manually.

Illustration:

(+) Indicator will be displayed between Pricing and Fare Calculation Mode Indicator (FCMI) will be shown on TST header line.
