Fare Display (FQD) Enhancement with new Tour Code Option for Negotiated/Unifares Fares

In response to the need and demands of our subscribers, Amadeus is pleased to announce a new feature that would enable to display Negotiated Fares filed with a Tour Code in the Fare Display transaction.

This quick and easy to use option (R, U, TC-"Tour Code name" or "number") will allow to search and display all types of Negotiated fares filed with the requested Tour Code. All Fare Display inputs and options are available with this new feature (including past dates).

Benefit to Customer:

Until today, customers did not have a possibility to display Fares by the Tour Code, but with this new tour code "TC" feature, it would enable Travel Agents to quickly target and display the fares with a dedicated tour code for specific carrier, thus increasing your efficiency.

Key features

- When Fare Display (FQD) transaction is used along with TC- option the content of the display is reduced only to those fares coded with the concerned Tour Code. All other fares normally qualifying for display will be filtered.
- Standard display/sale security applies, i.e. only those fares distributed for display and sale by the office generating the request can be returned.
- Tour Code option can also be used with Unifares corporate code or corporate name.
- Tour Code specified may be up to 15 characters in length.
- Option is combinable with '/R, UP' option used to request the display of both Unifares and Public fares.
